

FEATURE HIGHLIGHTS

- Dual 10/100 Mbps Ethernet port, with optional PoE PD or 100/1000 Mbps SFP Slot
- 4-port RS-232/422/485, baud rate up to 921.6 Kbps
- IP30 Metal housing with Aluminum heat sink
- Strong EMC protection, works in environments from -40 to 85°C
- Same hardware platform for different protocol conversion (Modbus TCP/ RTU/ASCII, DNP3.0 TCP or serial, IEC 60870-5-101, IEC 60870-5-103, IEC 60870-5-104, IEC 61850)
- Optional Full-License version for simultaneous transformation of multiple protocols.
- User friendly configuration with a Java-Based Windows utility
- Embedded PPTP, IPsec VPN or OpenVPN for enhanced security
- LAN Redundancy through embedded RSTP Protocol

PRODUCT DESCRIPTION

The PG59XX Series is a highly reliable and fault tolerant Industrial Protocol Gateway. Its powerful architecture provides seamless conversion between the different protocols Ethernet or Serial based. The serial devices communicating on different protocols could be integrated into the system and extend its reach over the gateway's redundant Ethernet. This device is designed to work in most demanding industries such as power substations, power generation, oil and gas, farming and manufacturing.

The configuration carried out through a user friendly, Java-Based Windows Utility called eNode Designer. It allows configuring target platforms, set device properties and protocol data point mapping. To do so, a project file representing the system should be created. This will include devices and the protocol applications running on them. The configuration is completely dependent on the "eNode Module" which represents that device or application – but may include things such as changing the communication port settings and defining where data point information enters and leaves the eNode Designer system.

PG59XX Series embeds an additional layer of security, allowing the devices to be deployed in topologies that request data to flow through the Internet and preventing sensitive control and monitoring data to be readable from malicious activities. IPsec VPN encryption, configurable in both peer-to-peer and peer-to-side modes will make sure the data passing is encrypted through a strong 128, 192 or 256-bit AES encryption.

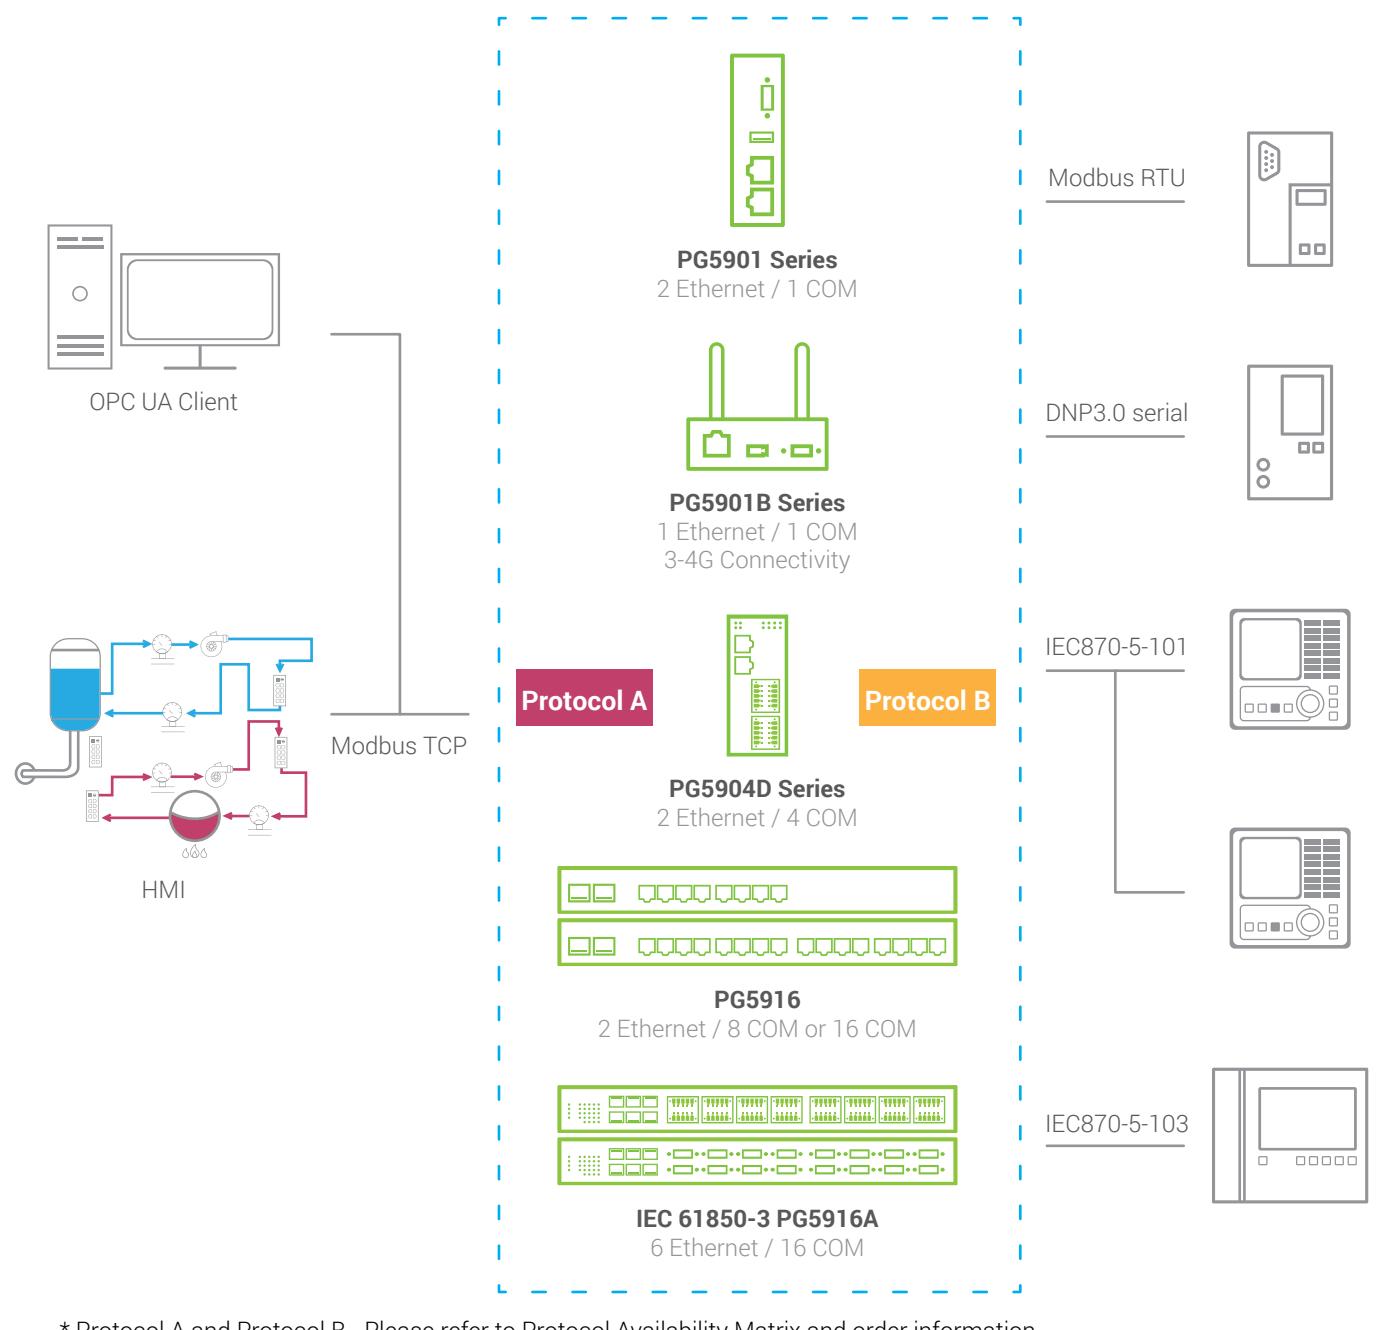

An additional highlight of ATOP protocol gateways is the ability to enable multiple protocols simultaneously. In contrast to conventional gateways, which require predefinition of a single master and slave protocol each, the Full-License model allows users to transform multiple incoming protocols in our protocol base to others compatible with the output side, achieving powerful protocol conversion functions, flexible operations, and easier maintenance.

APPLICATION

Features

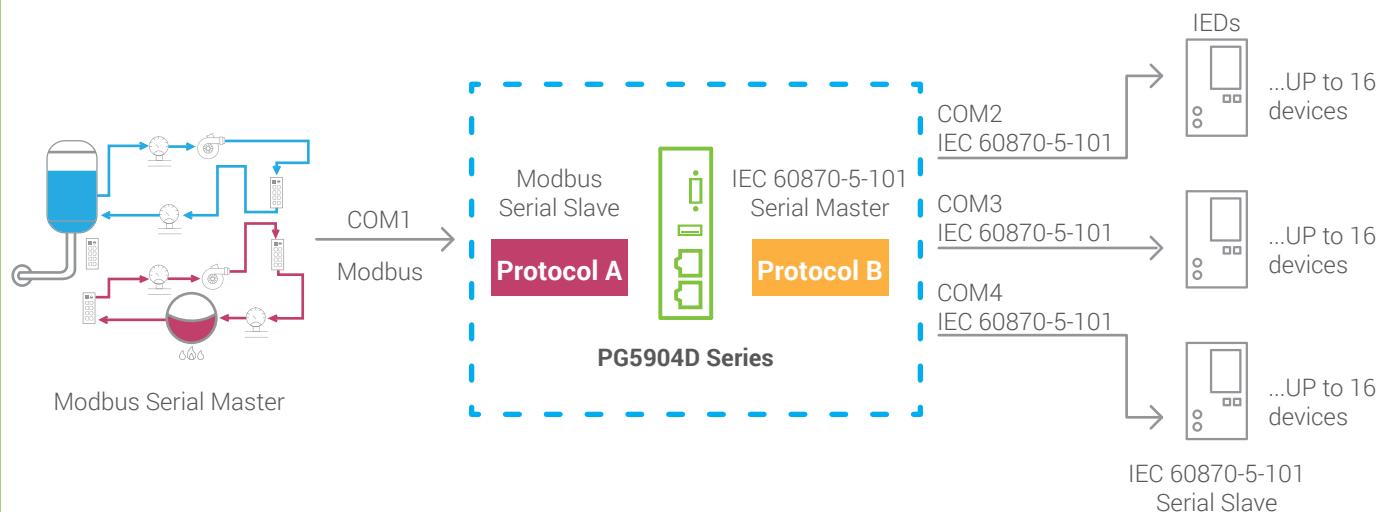

- The protocol gateway's embedded protocol stacks allow
- Seamless conversion
 - Exception/error Management
 - Unsolicited event management for the protocols requiring them (such as DNP3)
 - High performance
 - Low cost

General Architecture

* Protocol A and Protocol B - Please refer to Protocol Availability Matrix and order information

Example

The example shows how to Easily connect a Modbus Serial HMI, through Atop's Protocol Gateway to an IEC60870-5-101 Serial slave IED. The host HMI has the role of a Modbus Serial Master while the end-device to be accessed is an IEC 60870-5-101 Serial slave. Atop's protocol Gateway acts towards the HMI seamlessly as a Modbus Serial Slave, answering the poll commands or the write commands required by the Host by its virtual Modbus ID. Meanwhile, it acts as a IEC 60870-5-101 Serial Master with regard to the end-device whose IEC 60870-5-101 address is mapped to the virtual Modbus ID that the HMI is accessing.

Be careful! – all gateway functions listed in the datasheet refer to the “Gateway” role, and not which “host” or “slave” the gateway is connected to. In this example, the SKU shown is “MBSS-01SM” (Modbus Serial Slave to IEC 60870-5-101 Serial Master)

PROTOCOL AVAILABILITY

Full-License PG5904D Series

Users can run single or multiple protocol(s) in both Protocol A and Protocol B sides.

PROTOCOL SPECIFICATION

IEC61850 Server/ Client

Supported Functions	<ul style="list-style-type: none"> Generic access to the data (Read, Write) 8 Logical Devices per Port GOOSE (Generic Object Oriented Substation Event) <ul style="list-style-type: none"> – a GOOSE message will be generated by the gateway automatically upon event(*) (*) Being other protocols not Real-Time, there is no guarantee that GOOSE message is generated within 1 ms from the event itself.
Supported Control Type of commands	<ul style="list-style-type: none"> Direct-with-Normal-Security Select Before Operate (SBO)-with-Normal-Security Direct-with-Enhanced Security Select Before Operate (SBO)-with-Enhanced-Security
Implemented Protocol Subsets	<ul style="list-style-type: none"> IEC 61850-6 (Substation Configuration Language Description: SCL) IEC 61850-7-1 (Principles and Models) IEC 61850-7-2 (Abstract Communication Service) Interface: ACSI IEC 61850-7-3 (Common Data Classes: CDC) IEC 61850-7-4 (Logical Nodes and data Object Classes) IEC 61850-8-1 (Mapping to Manufacturing Message Specification: MMS) Edition 1 & Edition 2 are both Supported

DNP3 Server/ Client/ Master/ Slave

General Specifications	<ul style="list-style-type: none"> Serial Mode or Ethernet with TCP or UDP Mode Server side supports serving up to 5 client in TCP Mode Client side in a single RS-485 port, supports connecting up to 16 IEDs Client side supports connecting up to 16 IEDs Maximum Fragment size 2048 octets Protocol implementation with configurable parameters conforms to IEEE Std 1815-2012 level 2
Supported Functions	<ul style="list-style-type: none"> Time Synchronization generic access to the data(Read, Write) Commands with or without preselection (Select, Operate, Direct Operate) Transmission of time-tagged events Counter management (Immediate Freeze, Freeze and Clear) Self-address
Supported DNP3 Object Library	<ul style="list-style-type: none"> Binary Inputs up to 8000 pts Binary Outputs up to 2000 pts Double Inputs up to 4000 pts Analog Inputs up to 250 pts Analog Outputs up to 250 pts Counters up to 250 pts

IEC 60870-5-103 Master/ Slave

General Specifications	<ul style="list-style-type: none"> Protocol implementation with configurable parameters conforms to the IEC 60870-5-103:1997 Every serial port supports only one IED Process Information in Monitor and Control Direction Unbalanced Modes
------------------------	--

Supported Functions	<ul style="list-style-type: none"> Station Initialization, Supports reset FCB and CU General Interrogation Clock Synchronization Command Transmission Test Mode Blocking of Monitor Direction
Supported DNP3 Object Library	<ul style="list-style-type: none"> Monitor direction: <ul style="list-style-type: none"> Status indications in monitor direction: from <16> to <30> Supervision indications in monitor direction: <32>, <33>, from <35> to <39>, <46>, <47> Earth fault indications in monitor direction: from <48> to <52> Fault indications in monitor direction: from <64> to <93> Auto-reclosure indications in monitor direction: from <128> to <130> Measurands in monitor direction: from <144> to <148> Control direction: <ul style="list-style-type: none"> General commands in control direction: from <16> to <19>, from <23> to <26>

DNP3 Server/ Client/ Master/ Slave

General Specifications	<ul style="list-style-type: none"> Server side supports serving up to 5 client Client side supports connecting up to 10 IEDs Protocol implementation with configurable parameters conforms to the IEC 60870-5-104 specification edition 2 Process Information in Monitor and Control Direction CP56Time2a timestamp for Control Commands
Supported Functions	<ul style="list-style-type: none"> Station Initialization Interrogation Read Procedure (Server side only) Cyclic Data and Spontaneous Transmission (Server side only) Clock Synchronization Transmission of Integrated Totals Direct and SBO command
Supported DNP3 Object Library	<ul style="list-style-type: none"> Monitors Points: Each supports maximum 1000 pts: Single Point, Double Point, Step Position, Bit String, Measured with Normalized Value, Measured with Scaled Value, Measured Short Floating Points Value, Integrated Totals. Control Points: Each supports maximum 500 pts: Single Command, Double Command, Regulating Step Command, Set Point Command with Normalized Value, Set Point Command with Scaled Value, Set Point Command Short Floating Point, Bitstring. Event Logging (Server Side only) Universal Event Buffer up to 20,000 Events

HARDWARE SPECIFICATION

Network Interface	
Ethernet Port	2x 10/100BASE-T(X) RJ-45 or 2x 100/1000 SFP Slots
LAN-port Mode	Dual Subnets or LAN Redundancy
Compliance	<ul style="list-style-type: none"> IEEE 802.3 for 10BASE-T IEEE 802.3u for 100BASE-T(X) IEEE 802.3af for Power over Ethernet PD (PoE version only) IEEE 802.3u for 100BASE-X (SFP version only) IEEE 802.3z for 1000BASE-X (SFP version only)

Serial Interface	
Connector	1x2 5 pin 3.81mm Terminal Block, or D-sub9 connector
Ports	4
Mode	RS-232/422/485, software selectable
Baud Rate	1,200~921,600 bps
Parity	None, Odd, Even
Data Bits	7,8
Stop Bits	1,2
Isolation	3 KV
USB Interface	
Speed	USB 2.0
Connector	USB A Type *1
Power Characteristics	
Connector	Terminal Block
Input Voltage	12-48 VDC, or 48 VDC (supplied by PoE)
Power Consumption	0.65A @12 VDC (max.)
Power Redundancy	Yes
Reverse Polarity Protection	Yes
Relay Output	1A@30 VDC (normal open)
Mechanicals	
Dimensions(W x H x D)	55mm x 145mm x 113mm
Installation	DIN-Rail or Wall-Mount (optional kit)
Reset Button	Yes
Weight	1000g
Environmental Limits	
Operating Temperature	-40°C ~ 85°C (-40°F ~ 185°F)
Storage Temperature	-40°C ~ 85°C (-40°F ~ 185°F)
Ambient Relative Humidity	5 ~ 95% RH, (non-condensing)
Software	
Protocols	IPv4, ARP, ICMP, TCP, UDP, DHCP Client, DNS Client, Telnet, HTTP, HTTPS, NTP, SMTP/TLS, SNMP v1/v2c/v3, Syslog, 802.1D-2004 RSTP, IPsec VPN peer-to-peer and peer-to-side, OpenVPN client/server (maximum VPN throughput of 37.9Mbps*), and PPTP
Configuration	Web interface, Telnet, Device Management Utility (basic device settings) eNode Designer windows Utility (protocol conversion related settings)
