

FEATURE HIGHLIGHTS

- Ideal for IoT and IIoT applications.
- Wide -20°C~70°C temperature range for Industrial EMC Protection
- 2 x 10/100Mbps Ethernet port
- Up to 16 x RS-232/422/485 port – selectable baud rate up to 921.6 Kbps
- 3 kV optional isolation on the serial ports (supports RS-485/422 only)
- SD Card slot
- Customizable LCM matrix and keypad
- Atop customized Linux SDK environment with reliable APIs
- 100~240VAC or 24~48VDC power input; one Relay Output alarm
- Rugged metal housing in 1U Rack-mount (rack-mount kit included)

PRODUCT DESCRIPTION

Providing connectivity for the Internet of Things

ATOP's Industrial Embedded Computer is your ideal flexible Gateway to the Internet of Things. It provides Serial, Ethernet connectivity and other interfaces that can unlock your potential. Based on your specific application, it allowing almost any serial device to be connected, providing and retrieving the data you need to and from the cloud, no matter what provider you're using.

Programmability

Write your customized application in C language and Run it on its powerful Industrial low-power 800MHz ARM Cortex A8 TI Sitara AM3354 CPU. Make flexible use of your peripherals, no matter storage, Serial, or USB are needed.

SE5908/16 is available as a SDK/BSP. The SDK development environment reserves the maximum flexibility. Bottom to top editable software architecture allowed easily to customize or add the IoT applications for different using scenarios. Included Linux kernel source extend the capability of the kernel layer. Changeable WEB pages allowed to easily customize proprietary style. With the SE5908/16, it will extend your possibility while building your IoT applications.

Rugged and flexible for advanced developments

SE5908/SE5916 embeds *high EMC protection, wide temperature operation*, programming and installation flexibility in one device. The device is available in two power input options (100~240VAC or 24~48VDC) and provides one additional relay output

APPLICATION

The **IoT** (Internet of Things) or **IIoT** (Industrial Internet of Things) is a trending topic these days. It's all about bringing devices, sensors, actuators, data and commands to the cloud, with the ultimate goal to improve the quality of life, the services Smart Cities can offer, saving energy or saving money. This requires two things: to vehiculate the collected data to the cloud in a format that can be recognized and processed and to process, compute and analyze all this amount of data in real time.

It is not a concept far from reality. Imagine you'd like to bridge a Modbus Sensor to the cloud. And you'd like to have the application running on the cloud to be able to process multiple sensors' data, and to trigger some event in some specific stations along the network. You may also have the need to override the cloud control and manage the application locally. Any application has its story.

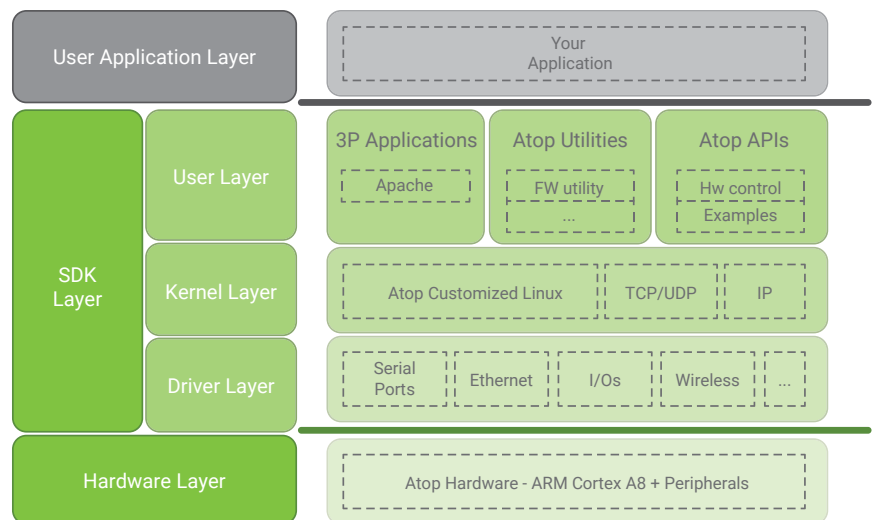

Here at ATOP, we understand these different needs and we are providing you different working models, based on what your needs are.

Use the Standard SDK, programmable embedded computer if:

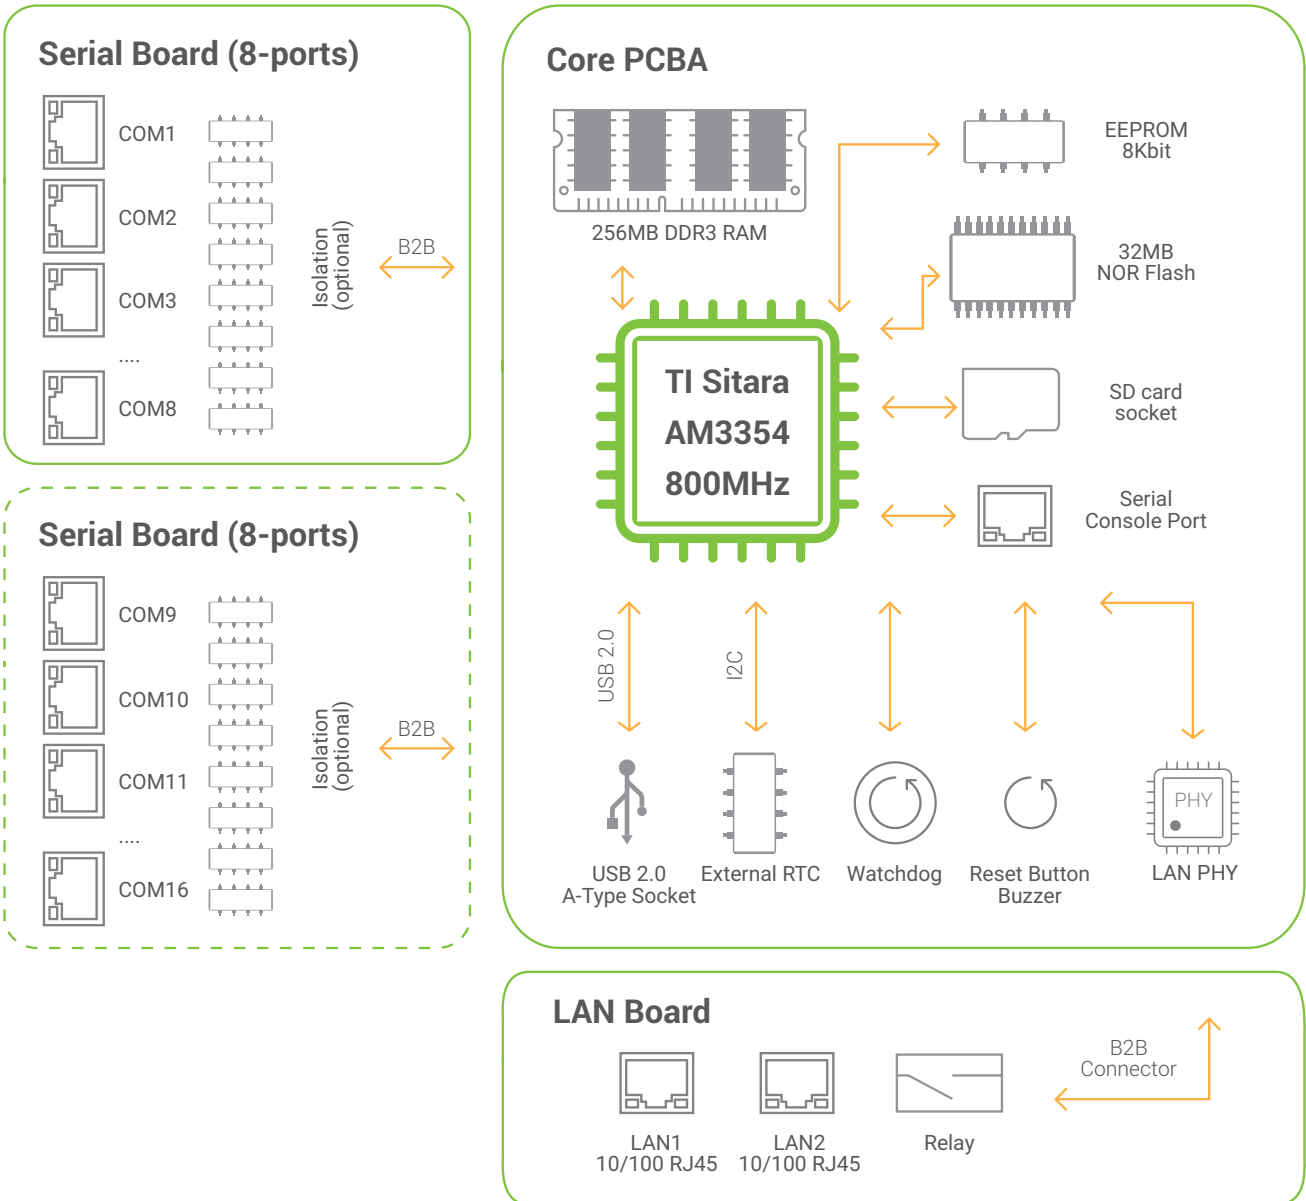

- You are familiar with Linux OS
- You have ANSI C programming skills
- Your application is strictly time/ performance sensitive
- Your application has very critical exception handling requirements

Our SDK products provide:

- Ported, proven and tested peripherals (such as I/Os, Ethernet, Serial, Relays) and integrated drivers
- ATOP customized Linux Kernel and network protocols
- Ported, debugged and proven third party applications
- Utilities and APIs to control the hardware in an easy and effective way
- Opened software architecture to create your own system image
- Linux source code to extend the kernel capability
- Modifiable WEB contents to customize proprietary WEB style
- Example of source code

BLOCK DIAGRAM

SPECIFICATIONS

Hardware Specifications									
CPU	Texas Instruments Sitara ARM Cortex A8 AM3354 800MHz								
Flash	32 MB NOR Flash (customizable upon request up to 128 MB)								
RAM	256 MB DDR3 (customizable upon request up to 512 MB)								
EEPROM	24LC64								
Watchdog	ADM706								
Real Time Clock (RTC)	Yes - with external chip								
Buzzer	Yes								
Console port	Yes - on-board connector								
Reset button	Yes								
Network Interface									
Standards	IEEE 802.3 for 10BaseT IEEE 802.3u for 100BaseT(X)								
Ethernet Ports	2x 10/100 BASE-TX RJ-45								
Serial Interface									
Connector	RJ45 Connector								
Ports	SE5908: 8 ports (RS-232/RS-422/RS-485, RS-422/RS-485 on Isolation vers.) SE5916: 16 ports (RS-232/RS-422/RS-485, RS-422/RS-485 on Isolation vers.)								
Serial Console	1x Serial Console port (RJ45)								
Serial Port Isolation	2.5 kV (SiS version only) - Isolation version supports only RS-422/RS-485								
Pull-high / Pull-low /Term. resistors	Software selectable.								
Configuration	<table border="0"> <tr> <td>Baud Rate</td> <td>50 ~ 921,600bps</td> </tr> <tr> <td>Data Bits</td> <td>5, 6, 7, 8</td> </tr> <tr> <td>Stop Bits</td> <td>1, 2</td> </tr> <tr> <td>Flow Control</td> <td>None, Xon/Xoff, RTS/CTS (RS-232 only)</td> </tr> </table>	Baud Rate	50 ~ 921,600bps	Data Bits	5, 6, 7, 8	Stop Bits	1, 2	Flow Control	None, Xon/Xoff, RTS/CTS (RS-232 only)
Baud Rate	50 ~ 921,600bps								
Data Bits	5, 6, 7, 8								
Stop Bits	1, 2								
Flow Control	None, Xon/Xoff, RTS/CTS (RS-232 only)								
Relay Output									
Relay Output	1x 1A@30VDC (Normal open)								
Other interfaces									
USB ports	1 x USB A Type (USB 2.0) - internal 1-port High-Speed OTG + power								
LCM Matrix	Programmable LCM Matrix with 5-buttons								
SD card	SD card slot (internal)								
Software									
Bootloader	U-boot 2014.07								
Linux kernel	Linux 3.14.26								
Linux toolchain	Linux 32 bits toolchain gcc (C/C++ PC cross compiler), glibc								
Linux sample code	RS232, RS422, RS485, RTC, watchdog, LED, Relay output, Buzzer, LCM Matrix, Input Buttons network socket								

Power	
Input Voltage	DC version: 24 - 48VDC; US-EU version: 100~240 VAC (EU or US Plug)
Input Current	DC version: 0.54 A @24VDC; US-EU version: 0.21A@100VAC
Power Consumption	Approximately 21 W (Max)
Connector	DC version: 5.08mm 3-pin Lockable Terminal Block EU-US version: IEC 60320-1 C14 AC Power Inlet
Power Redundancy	No
Reverse Polarity Protection	Yes (DC version only)
Environmental limits	
Operating Temperature	-20°C~70°C (-4°F~158°F)
Storage Temperature	-40°C~85°C (-40°F~185°F)
Ambient Relative Humidity	5%~95% (Non-condensing)
Mechanicals	
Housing	IP30 protection, SPCC metal housing
Dimensions(W x H x D)	436 mm x 43.5 mm x 200 mm
Installation	19" Rack-Mount (Kit included)
Weight	3,000g (8-port version); 3,200 g (16-port version)
Reset Button	Yes
