

Industrial Serial Device Server Industrial Modbus Gateway Industrial Modbus Concentrator Industrial Protocol Gateway

SE5901/MB5901/PG5901 Series

Hardware Installation Guide

Version V2.0 Updated in June, 2024

Installation Overview

The device's appearance is as in the figure below.

- If you have purchased the wall mount kit, proceed to place the screws on the back of the device as shown in (Fig. 1).
- 2. Although internal grounding has been done inside, in order to ensure overall maximum performance and protect your device it is still strongly advised to ground the device properly; hazardous ESD can come into contact with it and damage your equipment. On the power terminal block, there is a terminal for Frame Ground, you can choose whether to connect it to the grounding or you may opt to connect to the grounding screw next to the terminal block (the one chosen should be connected at all times) (Fig. 2).

4. Once the plate has been firmly put in place, proceed to mount the whole device as shown in (Fig. 3).

Proceed to (Fig. 4) if you want to remove the device from DIN-Rail.

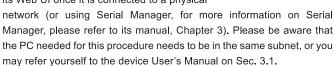

(c)

(Fig. 1)

· •

- 5. Next we can then proceed to connect the device to the LAN (switch or PC, depending on the case), take care on using the RJ-45 connector; after this we can then proceed to the device's settings.
- The openings to the sides are for the device's heat dissipation please never obstruct or cover them with any objects or try to insert them through it.
- The device's factory IP by default is 10.0.50.100 you can access the device by its Web UI once it is connected to a physical network (or using Serial Manager, for metwork)

If the device requires servicing of any kind, you may need to disconnect and remove it from its mounting. The initial installation should be done in a way that makes this as convenient as possible.

Voltage/Power lines should be properly insulated as well as other

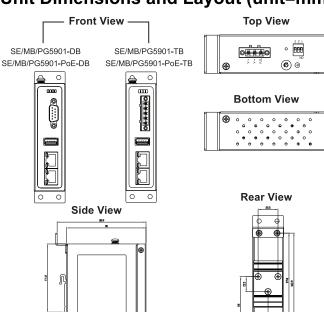

- cables. Be careful when handling them so as to not trip over.
- Do not under any circumstance insert foreign objects of any kind into
- the heat dissipation holes located in the different faces of the device. This may not only harm the internal layout but might cause harm to you as well.
- Do not under any circumstance open the device for any reason, Please
- contact your dealer for any repair needed or follow the instructions on section of your User's manual.

Package Check List

Inside the package you will find the following items:

- Industrial Serial Device Server x 1 or Industrial Modbus Gateway x 1 or Industrial Modbus Concentrator x 1 or Industrial Protocol Gateway x 1
- 3-Pin 5,08mm Lockable Terminal Block x 1
- 5-Pin 5.08mm Lockable Terminal Block x 1 (for SE/MB/PG5901-TB models)
- Din Rail Kit x 1 (Already mounted to the device)
- Installation Guide + Warranty Card x 1

	5	SG	SG	SG

DIP switch

Mode	Pin	Function	ON	OFF
	1	Terminal Resistor 120Ω (D±)	Enable	Disable
RS-485-2W	2	Pull Low Resistor (D -)	1ΚΩ	100ΚΩ
	3	Pull Hight Resistor (D +)	1ΚΩ	100ΚΩ
	1	Terminal Resistor 120Ω (Rx±)	Enable	Disable
RS-422	2	Pull Low Resistor (Rx -)	1ΚΩ	100ΚΩ
	3	Pull Hight Resistor (Rx +)	1ΚΩ	100ΚΩ
	1	Terminal Resistor 120Ω (Rx±)	Enable	Disable
RS-485-4W	2	Pull Low Resistor (Rx -)	1ΚΩ	100ΚΩ
	3	Pull Hight Resistor (Rx +)	1ΚΩ	100ΚΩ

LED Indicators

Name	LED	Status	Description		
COM-TX Green	Groon	Blinking	COM port is transmitting data		
	Green	Off	COM port is not transmitting data		
COM DV	Croon	Blinking	COM port is receiving data		
COM-RX Gre	Green	Off	COM port is not receiving data		
		On	Ethernet is connected		
LAN Green	Orange	Off	Ethernet is disconnected		
	Blinking	Ethernet is transmitting at 100Mbps			
	Green	Off	Ethernet is transmitting at 10Mbps		
Davisar		On	Power is being supplied		
Power Gre	Green	Off	Power is not supplied		
RUN	√ Green − − − − − − − − − − − − − − − − − − −	AP Firmware is running normally			
KUN G		On/Off	System is not ready or halt		

^{**}The wall mount kit illustrated in this document is for reference only and is not included in the package.

Warranty Policy

Warranty Conditions

Products supplied by ATOP Technologies are covered in this warranty for sub-standard performance or defective workmanship. The warranty is not, however, extended to goods damaged in the following circumstances:

- (a) Excessive forces or impacts
- (b) War or an Act of God: wind storm, fire, flood, electric shock, earthquake
- (c) Use of unqualified power supply, connectors, or unauthorized parts/kits
- (d) Replacement with unauthorized parts

RMA and Shipping Costs Reimbursement

Customers shall always obtain an authorized "RMA" number from ATOP before shipping the goods to be repaired to ATOP. When in normal use, a sold product shall be replaced with a new one within 3 months after purchase. The shipping cost from the customer to ATOP will be reimbursed by ATOP.

After 3 months and still within the warranty period, it is up to ATOP whether to replace the unit with a new one; normally, as long as a product is under warranty, all parts and labor are free of charge to the customers.

After the warranty period, the customer shall cover the cost for parts and labor. Three months after purchase, the shipping cost from the customer to ATOP will not be reimbursed, but the shipping cost from ATOP to the customer will be paid by ATOP.

Limited Liability

ATOP shall not be held responsible for any consequential losses from using ATOP's product.

Warranty Period

Product Categories	Warranty
Ethernet Switches	
Wireless	
Serial Device Servers	
Modbus Gateways	5 Years
Protocol Gateway	
Embedded Device Servers	
Media Converters	
DIN-Rail Power Supplies	3 Years
Power Adaptors	
Antennas	1 Year
Other Accessories	

The warranty certific	cation will	not be ef	fective until an authorized	d stamp
issued by ATOP's ove	erseas ag	ents.
