

FEATURE HIGHLIGHTS

- Industrial Communication mode combines advanced features such as Flash Roaming, PROFINET Transparent, and VLAN Tagging
- Engineered for Extreme Condition(-30°C to 70C) with Advanced EMC Design
- Versatile Operating Modes for Tailored Connectivity (WDS Bridge and AP Client)
- Seamless Wi-Fi Connectivity with Sub-30ms Flash Roaming
- Standard Wi-Fi Roaming(802.11r) with Sub-100ms Roaming Time*
- Reliable 32ms PROFINET I/O Transmission over Wi-Fi
- PROFINET Transparent Mode for Addressing NAT & PROFINET Deployment
- Streamline Device Management with NIMBL Centralized Software
- Security Compliance with IEC 62443-4-2 Standards*

*In Development Plan

PRODUCT DESCRIPTION

Wide application

AW5601 is a rugged, industrial-grade wireless access point suited for harsh conditions. Utilizing the 5GHz frequency band, AW5601 causes minimal interference with existing wireless devices, allowing easy upscaling of systems. Besides basic AP/Client modes, an additional WDS Bridge mode allows distribution from a WDS Root to multiple WDS Hybrids and wireless devices. WDS Root and Hybrids have the same wireless MAC address, SSID, and wireless channel settings, forming a larger, more flexible wireless network than simple APs.

High efficiency

Developed specifically with industrial automation in mind, the AW5601 features Flash Roaming and PROFINET transparency, empowering AGV/AMR applications with less latency, simpler topologies, and higher efficiency, which can be further enhanced with PoE PD support.

Simply secure

Security is also vital in AW5601's design. State-of-the-art encryption complements the ability to create a virtual network among wireless clients, enabling easy and intuitive communication control between clients while imposing restrictions on data and excluding malware. And finally, AW5601 embodies a robust wireless network manager to help your network deliver optimal performance.

APPLICATION CASES

AP mode and Client mode

WDS mode

Industrial Communication Mode

The AW5601-IC model includes a built-in Industrial Communication Mode, which combines advanced features such as Flash Roaming, PROFINET Transparent, and VLAN Tagging. Under this mode, packet transmission over wireless also differs from regular transmission. See the below diagram for details.

Features on Industrial Communication Mode:

1. Flash Roaming
2. PROFINET Transparent and over-NAT Application
3. VLAN tag
4. PROFINET QoS
5. Other Industrial Protocols (by request)

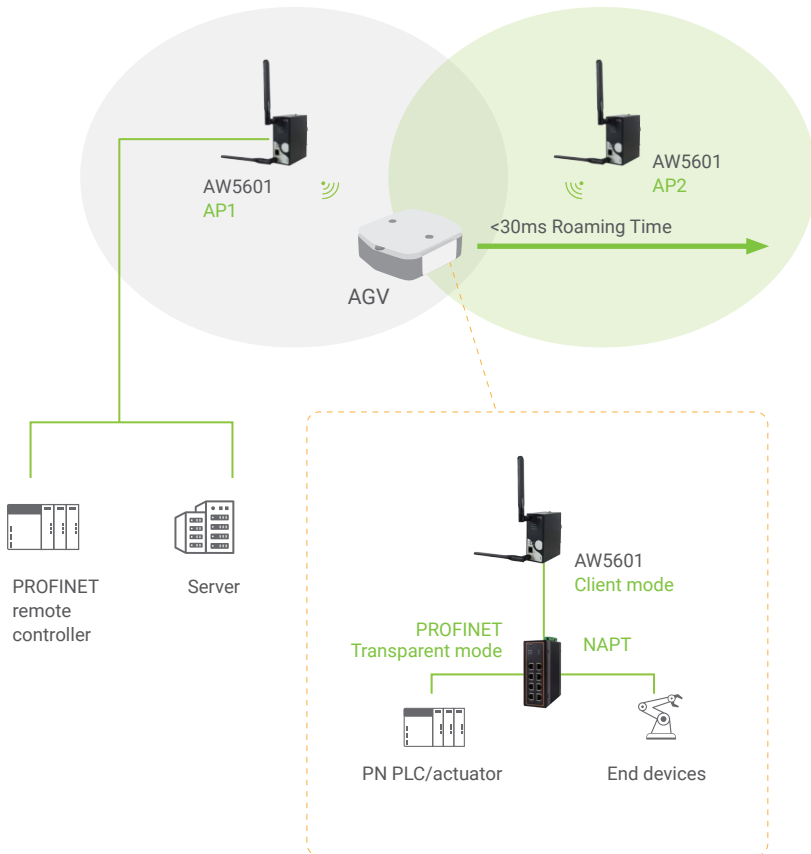

Industrial Communication Mode

Regular (Non-IC) Mode

Application on AGV with Flash Roaming and PROFINET Transparency

AGVs and other mobile systems can move beyond the range of a single AP. Yet, for processes that operate in transit, the latency due to network handover can be crucial. AW5601 offers Flash Roaming that achieves handover with less than 30ms signal switching latency, causing minimal impact on operation.

An AGV is a small system incorporating several controlled devices and a CPU or PLC for management. Considering the number of total devices in a site, AGV networks are usually set as small LANs, with end-device traffic undergoing network address translation (NAT/NAPT) to conserve the number of globally valid IPs.

Many PLCs, however, work with PROFINET packets under a NAT/NAPT environment, which will be lost through address translation. Therefore, AW5601 supports a PROFINET Transparent mode to allow explicitly permitted PROFINET communications to pass through under a NAT/NAPT environment, achieving both efficiency and effectivity in AGV systems.

* The data is the result of tests conducted in a standard lab.

DIMENSIONS & LAYOUT

SPECIFICATIONS

Technical Specifications	
Model Name	AW5601
Connectivity	
Wi-Fi Parameter	802.11a (5.0GHz), 802.11g (2.4GHz) 802.11n (2.4GHz/5.0GHz), 802.11ac (5.0GHz)
Ethernet Port	1x 10/100/1000Mbps (802.3at PoE PD; optional)
Software Characteristics	
Watchdog	Yes
Operation Modes	AP, Client, WDS, WDS Hybrid (Repeater), Industrial Communication
Wireless Security	WPA/WPA2/WPA3 PSK/Enterprise
Network Security	Client isolation, firewall/filtering
Alert Events	E-mail, SNMP Trap
Support Protocol	ICMP, TCP, UDP, DHCP Server/Client, DNS, SNMP, NTP, SMTP, HTTP, IPv4, SNMP v1/v2, NTP, SNTP, SMTP/Syslog, HTTP/HTTPS, IPv4, TFTP, ICMP, NAT/NAPT/Static NAT, ARP, STP/RSTP(forwarding)
Configuration	ATOP Management Utility, Web UI
Diagnostic Functions	System status
Others	Flash roaming, PROFINET transparent
Wireless Characteristic	
Tx / Rx	2T2R MIMO
Standard Conformance	802.11a/g/n/ac
Antenna (5GHz)	2x RP-SMA(M) connectors, 5dBi
Data Rate	
802.11a/g	54Mbps
802.11n	300Mbps
802.11ac	867Mbps
Antenna	
Gain	2.4GHz(3dBi), 5G(5dBi)
Connector	2x RP-SMA(M) connectors

Output Power & Sensitivity

802.11g

Data Rate	Tx +/- 2dB (1TX)	Rx Sensitivity +/- 2dB
1~11Mbps	20dBm	-90dBm
6Mbps	21dBm	-90dBm
9Mbps	21dBm	-89dBm
12Mbps	21dBm	-88dBm
18Mbps	21dBm	-87dBm
24Mbps	21dBm	-84dBm
36Mbps	20dBm	-81dBm
48Mbps	19dBm	-77dBm
54Mbps	18dBm	-75dBm

Power Characteristics	
Input Voltage	12-48 VDC
Input Current (12VDC)	0.56 A @ 12 VDC
Power Consumption	Approximately 6.72W (Max)
Reverse Polarity Protection	Yes
Connection	3-pin Lockable Terminal Block
Mechanicals	
Dimensions	47x110x90 mm
Installation	DIN-Rail, wall mount (optional kit)
Reset Button	Yes
Ingress Protection Rating	IP30 Protection
Environmental Limits	
Operating Temperature	-30°C to +70°C
Storage Temperature	-40°C to +85°C
Ambient Relative Humidity	5% to 95%, 55°C (Non-condensing)
